FP-2:Login with a valid email a...	High	Passed [v1]	Passed [v1]
FP-4:Login with a non-verified...	High	Blocked [v1]	Blocked [v1]
FP-5:Login with a valid email a...	Medium	Failed [v1]	Failed [v1]
FP-3:Login with an invalid email	Low	Passed [v1]	Passed [v1]

*This report shows the last test case execution result for each build, analyzing test cases **with and without tester assignment**.*

Example:

Test Case has been executed in this order:

Build 1.0 - Passed; Build 1.0 - Failed

-> Last Result for Build 1.0 is Failed because second execution overrides older results.

"[Latest (created) Build]" and "Latest execution" column show data according to this example:

Test Case has been executed in this order:

Build 1.0 - Passed; Build 1.0 - Failed; Build 2.0 - Blocked; Build 1.0 - Passed

-> [Latest (created) Build] : Blocked because Build 2.0 is the last build created for which a result has been set.

-> "Latest Execution" : Passed because Build 1.0 has been executed at last.

The shown priority is calculated based on the importance of the currently linked test case version.
